Address of Applicant :Department of Basic Sciences, IES University Bhopal, Ratibad, Main Rd, Bhopal, Madhya Pradesh 462044, India. Bhopal -----

(57) Abstract :

A wearable safety device for women, comprises of a circular frame 1 accommodated around waist portion of a women, a laser acuity sensor to detect diameter of the women's waist, an air compressor to inflate an inflatable unit 2 equipped at inner periphery of frame 1 to grip the women's waist, a set of cameras 3 to detect direction of approaching individual, a laser projection unit 5 mounted on bodies 4 to project laser beam in individual's eyes, plurality of electronic nozzles 6 connected with a chamber 7 stored with adhesive solution to dispense solution on ground surface for adhering the individual's foot over ground surface, a ring 8 configured over frame 1 via a motorized slider 9 attached with chains 10 to rotate and form a perimeter in order to prevent individual from touching the women and eliminate the chances of unfortunate incidents.
